## Technical specifications

## BIGPRINTER BIGJET UV RTR iP3307M

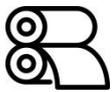

### COLOR MODEL

CMYK/ CMYK+W/ CMYKLcLm/ CMYKLcLm+W/  
2\*CMYK

### PRINT SPEED

High quality - up to 55 m<sup>2</sup>/h  
Max- up to 105 m<sup>2</sup>/h

### ROLL FEED

10 adjustable pinch rolls; two adjustment directions.

### WHITE COLOR

Direct white ink circulation through the printing head, free of nozzles clogging.

### PRINTHEADS AREA

High precision printing heads base

### UV LAMPS

Powerful UV lamps: 200W/cm.  
16 levels of adjustment.

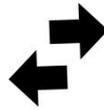

### SOFTWARE

Onyx RIP

### WARRANTY PERIOD

1 year

### PRINT DIRECTION

Unidirectional, bidirectional printing

### RESOLUTION

1016 X 1440 dpi

### PRINT WIDTH

3200 mm

### INK SUPPLY SYSTEM

Independent ink purge and vacuum system for each channel.

### NUMBER OF PRINTHEADS

4 - 8 units

### SMART PRINT&CUT

Supports SMART PRINT & CUT Onyx RIP module with automatic image recognition

### INTERFACE

USB

## Advantages

## BIGPRINTER BIGJET UV RTR iP3307M

BIGPRINTER BIGJET UV RTR large-format roll-to-roll UV printer is the new development dedicated to the highest quality production of graphics for the outdoor and indoor applications.

BIGJET UV RTR is designed and assembled in Russia by the leader of the digital printing market in the country - "BIGPRINTER Digital Innovation LLC".

### **Printer chassis:**

- Ideally designed robust frame. Flawless media handling.
- Heads carriage linear motor driver for accurate dot placement.
- Precise mechanics. Reinforced beam.
- Solid design for great accuracy.
- Shuttle safety sensors for the printing heads protection.
- Built-in anti-static system.

### **Ink system:**

- KM 1024i printing heads (13 or 30 pl)
- Reliable negative pressure system.
- White ink circulation directly through the head. Nozzles clogging free.
- Ink overflow electronic protection.
- Automated head cleaning system.
- Digital ink level sensors in the main tanks and secondary-tanks as well.
- Automated degassing system (air bubbles free ink system).
- Separated ink purge system for each colour channel.
- Convenient maintenance zone.

### **Precise and easy feeding of all types of media:**

- Feeding rolls diameter – 80mm.
- Unwinding rubber roll prevents media slipping.
- User friendly media feeding system.
- Perfect wind-up of the print results.

### **Professional UV Drying System:**

- Powerful 200 W/cm UV lamps, with a professional cooling system.
- Guaranteed ink curing without production speed compromising.

### **High precision encoder:**

± 1 micron.

### **Separate protected electric cabinet:**

- Electric protection system made by ABB (Germany).
- Easy access for the maintenance and repair purposes
